MAINTENANCE & GEARS

## MGH Breather

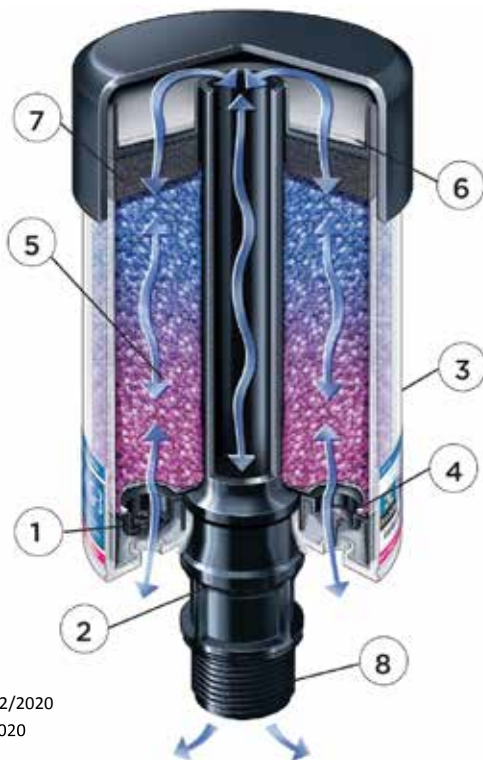

The ideal solution against moisture and particulate contamination in gearboxes. Check-valves on the bottom isolate the gearbox until it needs to breath.

The silica gel constantly adsorbs moisture from out of the gearbox. When inhaling outside air the Ventguard first dries and cleans the air.

Type	Max.Vol.	H2O ads.	Conn.	Height
VG 1	132l	50ml	3/8"	13.5 cm
VG 2	757l	118ml	1"	15.6cm
